2876

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 16 September 2002.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-15 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-15 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
- If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
- a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s) _____.
- 4) ☐ Interview Summary (PTO-413) Paper No(s) _____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____.

Art Unit: 2876

DETAILED ACTION

1. Receipt is acknowledged of the communication filed 9/16/02.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all

obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Houvener et al, US Patent No. 6,016,480, in view of Talvakar et al, US Patent No. 5,568,177.

Houvener et al disclose a merchandise return fraud prevention system and method comprising: a point of return terminal 1, the point of return terminal 1 comprises a number of input devices tailored to accept inputs of data which can be used to positively identify individuals returning articles of merchandise at the point of return: a standard magnetic strip reader number 4; a barcode reader 4'; an input keypad 5, a first display means 6, which is preferably a miniature flap panel display, a second display means 6', which is configured to display textual data, which may be, for example, a liquid crystal display (LCD) are included. The terminal also comprises controller 7, and an internal communications modem or other communications means 8 to enable data exchange between the terminal and the remote database site (see col. 3, line 38+).

Houvener et al fail to disclose or fairly suggest an encoding device for providing a machine readable post-purchase invisible indicia.

Talvakar et al disclose a thermal transfer printing ribbon for printing security bar code symbol comprising: a thermal printing ribbon for printing security bar code symbols 10, wherein the bar code is invisible to human eye (see figure 1; col. 1, lines 48-57 and col. 2, line 31 +).

In view of Talvakar et al's teachings, it would have been obvious for a person of ordinary skill in the art at the time the invention was made to employ the well known invisible bar code symbol in conjunction with the system of Houvener et al as a means for identifying and verifying the returned merchandises. Such modification would make the system more practical wherein the returned items could be identified using the customers' identification and/or using the invisible code associated with the items. Further, using invisible marking for processing returned merchandises is notoriously old and well known in the art for preventing fraud. Therefore, it would have been an obvious extension as taught by Houvener et al.

Response to Arguments

4. Applicant's arguments with respect to claims 1-15 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Watchtel, US Patent No. 4,186,020, discloses a fluorescent ink for automatic identification. Chang et al, US Patent No. 5,644,352, disclose a multicolor heat-sensitive verification and highlighting system. Steger, US Patent No. 5,925,865, discloses an automated check verification and tracking system.
